

Total Loss

As values of older vehicles fall and repair costs increase, more vehicles are being declared a 'total loss'. We understand how important it is that an acceptable valuation is agreed quickly. For all non fault, total loss claims we will ensure that the vehicle is inspected by an expert and a professional valuation given as quickly as possible. We will then negotiate directly with the relevant insurer to agree an acceptable sum to be reimbursed to the customer.

What our total loss service means for your customers:

- We will arrange speedy valuation of the vehicle by a professional engineer;
- We will negotiate on behalf of the customer directly with the relevant insurer;
- There's no need for a claim on the customer's own insurance;
- We will ensure prompt payment of the settlement amount.
